

K-Love serves my local area as positive news and messages. Much of the news we hear today is negative and serves to depress us. I believe that if K-Love were removed that the positive influence they bring would not be replaced with the same type of message. I believe it is in the publics' interest to leave K-Love on the air as-is here in Bend because they bring a format that doesn't require screening for people of any age, background or interest unlike much of the FM stations that can be heard here locally. I do not feel that the format of many stations heard today reflects values that are beneficial to a community but are rather selfish in nature.
